Online Chapter 3, Appendix A: Difference of Means Test for Government Spending

Indicate your preference: Cutting government spending is the only way to improve our economic outlook (coded 1); a policy in-between (coded 2); more government spending is needed to alleviate economic hardships Americans are suffering (coded 3).				
	Group Mean	**Standard Error**	**95% Confidence Interval**	
Non-Millennial	1.691	0.031	1.631	1.752
Millennial	1.695	0.027	1.643	1.747
	Wald Test	Non-Millennial = Millennial $F(1, 1541) = 0.01$ Prob > F = 0.939 N = 1,542		
Note: Means test run on estimate sample, given survey weights for Millennial and non-Millennial to correct for the oversample of Millennials.
