FOREWORD

This volume gathers the harvest of recent doctoral dissertations on South Asia, principally from North America and Western Europe, but exclusive of theses from universities in South Asia itself. The yield—1305 dissertations based on research carried out during the early and middle nineteen-sixties and brought to completion between 1966 and 1970—is even greater than one would have guessed, eloquent testimony to the expansion of South Asian studies in the West over the last decade. It will not be claimed, of course, that the results of all this fervid scholarly industry are of uniformly high standard. In fact, "Treasures and Trivia" might aptly characterize the range of quality to be found in these 1305 entries, had not that title been pre-empted by Paul W. van der Veur and Lian The as a rubric for American dissertation research on the neighboring region of Southeast Asia. What is claimed is that the magnitude of the research effort here surveyed demands, if we are to go on to improve the quality and depth of dissertation scholarship on South Asia, just the sort of bibliographical controls which Mr. Frank Shulman provides in this volume.

Mr. Shulman's bibliographical services to Asian studies in general are well known to readers of the Newsletter of the Association for Asian Studies (now Asian Studies Professional Review), to which he contributes a section on current dissertation research over the entire area of South, Southeast and East Asia. South Asian specialists may not know that the present volume was preceded by his Japan and Korea: An Annotated Bibliography of Doctoral Dissertations in Western Languages, 1877-1969 (Chicago: American Library Association, 1970) and, with Leonard H. D. Gordon, Doctoral Dissertations on China: A Bibliog-

No one is exactly sure where his bibliographical daimon will lead him next, but CSSEAS Publications are pleased that Mr. Shulman has spent some considerable time and labor with us in South Asia, and proud to make his work available to scholars as a part of Michigan Papers on South and Southeast Asia.

INTRODUCTION

The present bibliography was designed initially as a limited listing of current American research that would help keep South Asian scholars informed of work being done on their respective countries. It has since developed into an annotated and classified compilation of 1305 dissertations submitted to educational institutions throughout the West since 1966. As such Doctoral Dissertations on South Asia seeks to be a comprehensive compilation of recently completed theses dealing in whole or in part with the former civilizations and the contemporary affairs of Ceylon, India, Nepal and Pakistan. At the same time, this work provides striking testimony of the dynamic growth of Asian Studies outside of the subcontinent and particularly in the United States, Great Britain, Germany and France, where most of the major centers of scholarship on South Asia are presently found. The bibliography, however, should not be viewed only as a means of publicizing the existence of a significant number of largely unpublished dissertations. The reader should also find it to be a convenient guide for securing copies of materials that embody some of the latest and most advanced work within the field.

Doctoral Dissertations on South Asia is an interdisciplinary work covering the natural sciences as well as the humanities and social sciences. In the process of compiling it, we have not made any attempt to select or discard titles on the basis of their relative value or intrinsic merit, for we assume that doctoral candidates will want to know at the very least what topics already have been chosen by their immediate predecessors. It should be noted, however, that bibliographic coverage is noticeably greater for dissertations completed within the English-speaking world than it is for those done elsewhere because of the unavailability of the latest data for several European countries. The compilation is essentially complete for the United States and Canada through 1970 and for Great Britain through 1969, but it lists only a portion of the relevant theses believed to have been submitted since the mid-1960's to institutions elsewhere in Europe and it is limited in the case of Australia to work done at the Australian Na-
ional University. Doctoral research undertaken in the Soviet Union has been omitted entirely.

As may be seen from the table of contents, we have classified all dissertations on the basis of the country with which they deal and the specific subject or time period with which they are concerned. The academic departments to which the dissertations have been submitted often did not serve as a criterion for their final classification. Within individual entries we provide the author's full name, the complete title and subtitle of his thesis (with an English translation, where necessary, that we have prepared), the name of the university in abbreviated form, and the calendar year in which the dissertation was completed or formally approved. In the case of works abstracted in Dissertation Abstracts International (DAI), we give the DAI reference volume and page numbers along with the University Microfilms (UM) order number. Where known, the number of pages in the dissertation is also included either in the form of the pagination for the microfilm copy (where the thesis is available from University Microfilms, Inc.) or as the number of pages in the actual typescript. Where logical categories of classification are mixed, we have been generous in supplying cross references, and these in turn are supplemented by a subject index (pages 221-28) designed to assist the reader in readily locating theses dealing with specific geographical entities, individuals, or literary and religious works. In addition, keys to all abbreviations used in the various entries are provided on page xvii; a listing of universities with their complete names is available in the Institutional Index (pages 209-20); and the numerical distribution of dissertations according to the years in which they were completed and the countries with which they deal may be found in Appendices A and B (pages 184-85). Finally, an appendix entitled "Availability of Dissertations" (pages 186-89) is included to guide the reader who is seeking to obtain copies of actual dissertation typescripts. He will do well to keep in mind the fact, though, that certain of these dissertations have already been published in book or article form or will be appearing in print before long.

While this bibliography is essentially an annotated compilation, we should point out that twenty-five percent of the entries are not annotated at all and that the annotations for most of the others have been kept as brief as possible. These annotations are designed primarily to help the reader obtain an idea of the scope and nature of a particular thesis; to call his attention to certain of its noteworthy features; or, on occasion, to justify the inclusion of a title that appears to be unrelated to South Asia. They are not intended to be evaluative or critical, and their length depends primarily upon the need for them and upon the amount of information readily available to the compiler. (In most cases these annotations have been based on infor-
mation provided in Dissertation Abstracts International.) Regrettfuly it has not been possible to secure information with which to annotate the majority of entries for European and Australian theses.

Definitions of South Asia as a geographical area have varied to some extent within academic circles. For the purpose of this bibliography, we have seen fit to include overseas Indian communities but have decided to exclude Afghanistan from consideration. Furthermore, we have refrained from subdividing Pakistan into the republics of Pakistan in the west and Bangla Desh in the east because all of the dissertations listed here deal with Pakistan prior to 1971. Nevertheless, we have sought to indicate whenever possible the particular geographical focus of dissertations dealing with those areas of the subcontinent.

As a compilation limited to doctoral research completed between 1966 and 1970 (with an additional 108 dissertations submitted to institutions in 1971 included for the sake of greater comprehensiveness), Doctoral Dissertations on South Asia updates the listings for South Asia found within Curtis W. Stucki's American Doctoral Dissertations on Asia, 1933--June 1966 (3d ed.; Ithaca, N.Y.: Southeast Asia Program, Cornell University, 1968). Our bibliography, moreover, complements a number of recently published bibliographies of theses covering Japan and Korea; China, Mongolia, Tibet, and the overseas Chinese communities; mainland and insular Southeast Asia; and the Arab World. We hope eventually to bring out a supplementary volume to this work and recommend that the reader refer until that time to the periodic listings of new dissertations appearing in the Asian Studies Professional Review, a journal published by the Association for Asian Studies.

In any compilation of this nature, the compiler must continually impose upon the goodwill and cooperation of his colleagues and associates. We are happy to take this opportunity, therefore, to acknowledge the assistance of those scholars and librarians in this country and abroad who have contributed information regarding their own dissertations and those of their colleagues and graduate students. In addition, Dr. Thomas R. Trautmann, Dr. Om P. Sharma, and Mr. Kenneth R. Hall (all of The University of Michigan) have provided invaluable editorial advice and constant encouragement. Finally, both the Center for South and Southeast Asian Studies (Professor L. A. Peter Gosling, Director) and the Center for Japanese Studies (Professor Robert E. Ward, Director) at The University of Michigan contributed to the completion of this bibliography through the former's willingness to support its publication within this occasional paper series and the latter's readiness to permit the use of its facilities while the compilation was in progress.

DAI 32 (Dec. 1971): 3401-A; UM 71-27,633. This work analyzes the decision of the British Government to declare war on Afghanistan in 1878 in order to defend India from possible foreign aggression.

controlled by men in either de jure or de facto fashion.

1290 Pastner, Stephen Lane. CAMP AND TERRITORY AMONG THE NOMADS OF NORTHERN MAKRAN DISTRICT, BALUCHISTAN: THE ROLE OF SEDENTARY COMMUNITIES IN PASTORAL SOCIAL ORGANIZATION. Brandeis, 1971. 260 p. DAI 32 (Dec. 1971): 3132-33-B; UM 71-30,144. Discusses the formation processes of Makrani nomadic social organization, from the level of the herding camps to the social and geographical boundaries of nomad territoriality. Also examines the ongoing interrelations of the herdsmen with the sedentary communities of the region.

1291 Pisharoti, Kattoor Achutha. FACTORS INFLUENCING FAMILY PLANNING PROGRAM PERFORMANCE IN INDIA. North Carolina, 1971. 272p. DAI 32 (Dec. 1971): 3467-B; UM 71-30,625. The author sought to determine (1) the extent to which program performance has been influenced by the socio-economic context within which the program operates, and (2) the extent to which program performance has been influenced by the administrative resources invested in the program.

1295 Roy, Mrinal. KAMARUPA-KAMAKHYA BHAGATS: A STUDY OF A CULT IN ITS SOCIAL PERSPECTIVE. Oregon, 1971. 153p. DAI 32 (Dec. 1971): 3134-B; UM 72-968. Studies the formation of a secret cult practiced by a group of Oran individuals (a tribal people centered in the Ranchi district of South Bihar). The cult was first learned by an individual member of the group from a Hindu living at Kamakhya in the Kamarupa district of Assam.

1300 Simmons, Ruth S. THE BERWAS OF DELHI: SOCIAL AND POLITICAL MOBILITY IN A CASTE OF EX-UNTACTHABLES. California (Berkeley), 1971.

1301 Singh, Inderjit. A RECURSIVE PROGRAMMING MODEL OF TRADITIONAL AGRICULTURE IN TRANSITION: A CASE STUDY OF PUNJAB, INDIA. Wisconsin, 1971. 598p. DAI 32 (Dec, 1971): 2874-A; UM 71-25,216. The dynamic microeconomic model for the development of the agricultural sector is tested for the period 1952-1965 for the central districts of the Indian Punjab and succeeds in explaining the tremendous increases in output and productivity, the mechanization of selected agricultural tasks in an apparently labor surplus environment, the structural changes in regional resource use, and the growth of commercialization.

1302 Stephenson, Alan Lynn. PROLEGOMENON TO BUDDHIST SO-
CIAL ETHICS. Claremont, 1971. 182 p. DAI 32 (Dec. 1971): 3416-A; UM 71-21,645. Investigates the doctrinal bases of Theravada Buddhism in order to determine their potential for the creation of a social ethic. Includes an examination of the concepts of samsara, karma, dharma, Nirvana, and shunyata.

AVAILABILITY OF DISSERTATIONS

While certain doctoral dissertations cited in this bibliography have already been published or will shortly become available in book form, the majority of them have never appeared in print except as journal articles. Most are available, nevertheless, for purchase on microfilm or in xerox form. The following guide outlines the availability of such works on a country by country basis:

AUSTRALIA: For copies of dissertations submitted to the Australian National University, write to: The Library; Australian National University; P.O. Box 4; Canberra A.C.T. 2600. In some cases access is restricted to staff and students of the Australian National University for a period of five years and such theses may be consulted and borrowed by others only if the author gives his permission. The author's permission, moreover, must be secured before photocopies of a dissertation can be sold. Copies are available at cost, and for microfilms this will usually be between Aust. $8.00 and $15.00 while xerox copies will be about three times as much. Copies are not usually supplied directly to research workers; application should be made through the library of a university or research institution.

CANADA: For microfilm copies of dissertations, write directly to: Canadian Theses on Microfilm; Cataloguing Branch; Room 414; National Library of Canada; Ottawa 4, Ontario. Inter-library loan requests for these same theses should be addressed to the reference branch of the library.

CZECHOSLOVAKIA: Write directly to the library of the university to which the dissertation has been submitted.

DENMARK: Each dissertation listed in this bibliography has been published and should be available at major academic libraries.

FRANCE: For copies of dissertations submitted to the Université de Paris, write to: Bibliothèque de la Sorbonne, 47 rue des
Écoles, Paris 5e. For dissertations submitted to other institutions, write directly to the libraries of the universities involved. It should be noted that since 1952, the Center for Research Libraries (5721 South Cottage Grove Avenue; Chicago, Illinois 60637) has received annually from the Ministry of Education of France all printed doctoral dissertations from all French universities in all subject fields except medicine. Furthermore, abstracts of many (but not all) dissertations accepted by the Université de Paris may be found in the following publications: (1) Université de Paris. Faculté des lettres et sciences humaines, *Positions des thèses de troisième cycle soutenues devant la Faculté* (Paris: Presses Universitaires de France, published annually), and (2) Université de Paris, *Annales de l'Université de Paris* (Paris: l'Université de Paris).

GERMANY: Microfilm copies of most unpublished dissertations submitted to universities in West Germany may be ordered from the libraries of the respective institutions. Copies of printed doctoral dissertations are available at several university libraries outside of Germany, among them The University of Michigan Library and the Center for Research Libraries (5721 South Cottage Grove Avenue; Chicago, Illinois 60637).

GREAT BRITAIN: Regulations vary from institution to institution, but in most cases the written consent of the author or of his university must be obtained before photocopies can be provided. Write directly to the university concerned or consult the editorial note of the latest volume of the Association of Special Libraries and Information Bureaux (ASLIB), *Index to Theses Accepted for Higher Degrees in the Universities of Great Britain and Ireland* for further details.

ITALY: Write directly to the library of the university to which the dissertation has been submitted.

NETHERLANDS: Most dissertations have been published and are available in the collections of several university libraries outside of the Netherlands, among them The University of Michigan Library and the Center for Research Libraries (5721 South Cottage Grove Avenue; Chicago, Illinois 60637). In all other cases, write directly to the library of the university to which the dissertation has been submitted.

PHILIPPINES: Write directly to the library of the university to which the dissertation has been submitted.
AVAILABILITY OF DISSERTATIONS

POLAND: Write directly to the library of the university to which the dissertation has been submitted.

SWEDEN: The dissertation listed in this bibliography has been published and should be available at major academic libraries.

SWITZERLAND: Most dissertations have been published and are available in the collections of several university libraries outside of Switzerland, among them The University of Michigan Library and the Center for Research Libraries (5721 South Cottage Grove Avenue; Chicago, Illinois 60637). In all other cases, write directly to the library of the university to which the dissertation has been submitted.

UNITED STATES: Copies of dissertations abstracted in Dissertation Abstracts and in Dissertation Abstracts International may be ordered directly from (1) University Microfilms, Inc.; P.O.B. 1746; Ann Arbor, Michigan 48106, or (2) University Microfilms, Ltd.; St. John's Road; Tylers Green; Penn, Buckinghamshire, England. Order by the author’s name, the dissertation title, and the dissertation's UM order number, specifying whether a microfilm or xerographic copy (bound in hardcover or softcover as desired) is to be prepared. Microfilm copies are available at $4.00 each and paperbound xerographic copies are sold individually for $10.00 ($2.25 additional for hardbound copies) regardless of the number of pages in the dissertation. Prices indicated in issues of Dissertation Abstracts published before 1971 should be disregarded, and all prices are subject to change without notice. Surface postage within the United States will be prepaid by University Microfilms if payment accompanies the order. Otherwise, a small handling and mailing fee will be charged the customer, who is invoiced at the time of shipment. Shipping and handling charges must be paid by the customer in the case of all foreign orders.

Dissertations submitted to the University of Chicago may be ordered directly from the Photoduplication Department; University of Chicago Library; Swift Hall; Chicago, Illinois 60637.

Dissertations submitted to Harvard University are available at the Harvard University Archives; Widener Library; Cambridge, Massachusetts 02138. Xerox and microfilm copies of any dissertation over five years old can be ordered directly from the photoduplication department of the library. Dissertations less than five years old may be reproduced only with the author's written permission (his address may be obtained from the University Archives). Harvard University dissertations also are available on inter-library loan unless restricted. The
reader should note that restrictions automatically are applied for a period of five years after awarding of the Ph.D. degree by the University for a dissertation submitted to the Department of History. For further details, write directly to the University Archives.

For copies of all other American dissertations, write directly to the library of the university where the dissertation has been accepted. The reader should keep in mind, however, that recently completed dissertations lacking a UM number in this bibliography will likely become available from University Microfilms by June 1972.

SUBJECT INDEX

This subject index is limited primarily to geographical, literary, and personal names appearing within the titles of respective dissertations and in the accompanying descriptive annotations. The names of Indian cities, districts, and villages, moreover, usually appear twice: as main entries, and as sub-entries under the states in which they are located. All numbers in the index refer to entry numbers.
